PHILIPS TECHNICAL REVIEW

VOLUME 12

1950/1951

PHILIPS RESEARCH LABORATORIES - EINDHOVEN

52
B 1228 410

CONTENTS

VOLUME 12, 1950/1951

LIGHT

Page

A small greenhouse with artificial lighting for studying plant growth under reproducible conditions, by R. van der Veen 1

The distribution of illumination on a plane parallel to a tubular lamp, by J. Loeb . . 60

Controlling the luminous intensity of fluorescent lamps with the aid of relay valves, by K. W. Hess and F. H. de Jong 83

Inactivation of bacteria by ultra-violet radiation, by J. Voogd and J. Daams 111

An instant-starting fluorescent lamp in series with an incandescent lamp, by W. Elenbaas and T. Holmes 129

Page

The colour triangle, by W. de Groot and A. A. Kruithof 137

Positioning of the sources of light when photographing with artificial light, by S. Gradstein 145

The "Photoflux series" of flashbulbs, by G. D. Rieck and L. H. Verbeek 185

The permissible brightness of lamp fittings, by D. Vermeulen and J. B. de Boer . . . 200

Motorcar headlights, by J. B. de Boer and D. Vermeulen 305

TELECOMMUNICATION

A measuring arrangement for waveguides, by A. E. Pannenborg 15

Saturation of fluorescence in television tubes, by A. Bril and F. A. Kröger 120

Two transmitting valves for use in mobile installations, by E. G. Dorgelo and P. Zijlstra 157

The manufacture of quartz oscillator-plates, III. Lapping and final frequency adjustment of the blanks, by W. Parrish 166

An instrument for recording the frequency drift of an oscillator, by W. W. Boelens . . 193

Radiographic examination of electronic valves, by H. B. van Wijlen 207

The electrical recording of diagrams with a calibrated system of coordinates, by B. G. Dammers, P. D. van der Knaap and A. G. W. Uitjens 283

CYCLOTRON

Cyclotron and synchrocyclotron, by W. de Groot 65

The synchrocyclotron at Amsterdam, by F. A. Heyn,

I. General description of the installation 241

II. The oscillator and the modulator . . . 247

III. The electromagnet 349

ELECTROTECHNICS

Controlling the luminous intensity of fluorescent lamps with the aid of relay valves, by K. W. Hess and F. H. de Jong 83

Wire and cable insulating materials with polyvinyl chloride as base, by E. A. J. Mol 97

Experimental testing of electrical networks by means of the unit function response, by J. van Slooten 233

MEASURING EQUIPMENT

Page

A measuring arrangement for waveguides, by A. E. Pannenborg 15

An experimental "stroboscopic" oscilloscope for frequencies up to about 50 Mc/s,

I. Fundamentals, by J. M. L. Janssen . 52

II. Electrical build-up, by J. M. L. Janssen and A. J. Michels 73

Measuring the deionisation time of gas-filled diodes and triodes, by K. W. Hess 178

An instrument for recording the frequency drift of an oscillator, by W. W. Boelens . . 193

Precise calibration of tuning forks, by C. C. J. Addink 228

Page

Experimental testing of electrical networks by means of the unit function response, by J. van Slooten 233

The electro-analogue, an apparatus for studying regulating systems, by J. M. L. Janssen and L. Ensing,

I. Components and functions 257

II. The electrical execution 319

The electrical recording of diagrams with a calibrated system of coordinates, by B. G. Dammers, P. D. van der Knaap and A. G. W. Uitjens 283

MATERIALS AND THEIR RESEARCH

The influence of temperature on the fluorescence of solids, by F. A. Kröger and W. de Groot 6

Wire and cable insulating materials with polyvinyl chloride as base, by E. A. J. Mol . 97

Saturation of fluorescence in television tubes, by A. Bril and F. A. Kröger 120

The manufacture of quartz oscillator-plates, III. Lapping and final frequency adjustment of the blanks, by W. Parrish . . 166

The oxidation of heat-resistant alloys in the presence of foreign oxides, by J. L. Meijering and G. W. Rathenau 213

Spectrochemical analysis, by N. W. H. Addink and W. de Groot 337

MISCELLANEOUS

On electrical shaving, by A. Th. van Urk . . 25

The Philips 100 kV electron microscope, by A. C. van Dorsten, H. Nieuwdorp and A. Verhoeff 33

Inactivation of bacteria by ultra-violet radiation, by J. Voogd and J. Daams . . . 111

On the regulation of industrial processes, by H. J. Roosdorp 221

The manufacture of virus vaccine against influenza, by A. J. Klein and E. Hertzberger 273

Applying coatings by electrophoresis, by S. A. Troelstra 293

BOOK REVIEW

B. G. Dammers, J. Haantjes, J. Otte and H. van Suchtelen, Application of the electronic valve in radio receivers and amplifiers. Volume I. R.F. and I.F. amplification — Frequency changing — Determining the tracking curve — Parasitic effects and distortion due to the curvature of valve characteristics — Detection 184
